Anwendungsbeschreibung	<p>Recommended for use in ELISA (0.1 µg/mL), immunohistochemistry, and western blot applications. Avoid using biotin-containing solutions as diluents and solutions containing sodium azide. Sodium azide is an inhibitor of horseradish peroxidase. It is recommended that the reagent be titrated for optimal performance for each application. NOTE: Do not use skim milk as a blocking agent in the assay with streptavidin, since skim milk contains free biotin which will cause high backgrounds.</p>
