| Produktbeschreibung      | TNFl like cytokine 1A (TL1A) and its receptors, death receptor 3 (DR3) and decoy receptor 3 (DcR3) are members of the TNF and TNF receptor superfamilies of proteins, respectively. Binding of APC derived TL1A to lymphocytic DR3 provides costimulatory sig... |
| Molekulargewicht         | 23.6 kDa                                                                                                                                                                                                                                                         |
| Tag                      | N-10*His                                                                                                                                                                                                                                                         |
| NCBI                     | 8                                                                                                                                                                                                                                                                |
| Puffer                   | 0.2 M Arginine, PBS, pH7.4                                                                                                                                                                                                                                       |
