DAGLB (NM_001142936) Human Over-expression Lysate BOB-LS221955-100UG

Artikelname	DAGLB (NM_001142936) Human Over-expression Lysate
Artikelnummer	BOB-LS221955-100UG
Hersteller Artikelnummer	LS221955-100ug
Alternativnummer	BOB-LS221955-100UG-100UG
Hersteller	Boster Bio
Kategorie	Proteine/Peptide
Spezies Reaktivität	Human
Produktbeschreibung	Transient overexpression lysate of diacylglycerol lipase, beta (DAGLB)... The product is a transient overexpression lysate of diacylglycerol lipase, beta (DAGLB). It is produced in HEK293T cells. The lysate contains recombinant human DAGLB protein. The protein has a molecular weight of approximately 45 kDa and a pI of approximately 8.5. The protein is expressed as a soluble monomer. The expression is driven by the CMV promoter. The lysate is prepared by lysing the cells and then centrifuging the supernatant. The resulting supernatant is then filtered and stored at -20°C. The product is intended for research purposes only and is not intended for use in humans or animals.
Quelle	HEK293T
