Product Datasheet

Human Interferon gamma protein, His tag (active), Unconjugated GTX00083-PRO

Artikelname	Human Interferon gamma protein, His tag (active), Unconjugated
Artikelnummer	GTX00083-PRO
Hersteller Artikelnummer	GTX00083-pro
Alternativnummer	GTX00083-PRO-10
Hersteller	GeneTex
Kategorie	Proteine/Peptide
Applikation	FA
Spezies Reaktivität	Human
Konjugation	Unconjugated
NCBI	3458
UniProt	P01579
Puffer	Reconstitute with 20mM Tris and 150mM NaCl to 0.1-1.0mg/ml. Do not vortex. Lyophilized from 20mM Tris, 150mM NaCl, 1mM EDTA, 1mM DTT, 0.01% SKL, 5% Trehalose, ProClin 300.
Expression System	E. coli
Formulierung	Lyophilized powder
Sequenz	N-terminal His-Tag, Gln24~Gln166 (NP_000610.2)

Anwendungsbeschreibung	IFN-gamma is a dimerized soluble cytokine that is the only member of the type II class of interferons. The importance of IFNgamma in the immune system stems in part from its ability to inhibit viral replication directly, and most importantly from its immunostimulatory and immunomodulatory effects. As reported, IFNgamma is an important activator of human monocytic THP-1 cells. Therefore, THP-1 cells were incubated in RPMI-1640 with various concentration of IFN-gamma, then cells were observed by inverted microscope everyday. After stimulated with IFN-gamma (2 ng/ml) for 5 days, morphological changes occurred in THP-1 cells which displayed the shape of fusiform or polygon and were more likely to adhere.
