## Product Datasheet

### HL-60 whole cell lysate, Unconjugated GTX05057

|                          |                                                                                                                                                                                                                                                               |

| Hersteller               | GeneTex                                                                                                                                                                                                                                                       |
| Kategorie                | Proteine/Peptide                                                                                                                                                                                                                                              |
| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Konjugation              | Unconjugated                                                                                                                                                                                                                                                  |
| Produktbeschreibung      | Cells were washed with PBS and then incubated on ice in modified RIPA buffer to lyse the cells. Protein integrity was ensured using a cocktail of protease inhibitors with broad specificity for the inhibition of aspartic, cysteine, and serine protease... |
| Konzentration            | 4 mg/ml (Please refer to the vial label for the specific concentration.)                                                                                                                                                                                      |
| Puffer                   | 1X RIPA Buffer with HALT Protease and Phosphatase Inhibitors, no preservatives.                                                                                                                                                                               |
| Formulierung             | Liquid                                                                                                                                                                                                                                                        |
