Product Datasheet

Biotinyl-Tyramide, CAS [[41994-02-9]] FBM-10-3446

Artikelname	Biotinyl-Tyramide, CAS [[41994-02-9]]
Artikelnummer	FBM-10-3446
Hersteller Artikelnummer	10-3446
Alternativnummer	FBM-10-3446-20MG, FBM-10-3446-100MG
Hersteller	Focus Biomolecules
Kategorie	Biochemikalien
Produktbeschreibung	Signal amplification reagent for immunoassays...
Molekulargewicht	363.47
Reinheit	98% by HPLC, NMR (Conforms)
Formulierung	White solid
CAS Nummer	[41994-02-9]
Formel	C18H25N3O3S
Anwendungsbeschreibung	Reagent for use in catalyzed reporter deposition (CARD) signal amplification protocols in a variety of immunoassays in which, horseradish peroxidase catalyzed deposition of biotinyl tyramide is detected with labeled streptavidin.1 Widely used for signal amplification in fluorescent in situ hybridization (FISH) protocols.2 May be used for signal amplification in a sandwich ELISA for quantification of alpha-tubulin isotypes.3 Reagent for "self-biotinylation of DNA G-quadruplexes.4 May be used with APEX-mediated biotin labeling to identify protein-protein interactions.5
