Product Datasheet

Grapiprant, CAS [[415903-37-6]] FBM-10-4006

Artikelname	Grapiprant, CAS [[415903-37-6]]
Artikelnummer	FBM-10-4006
Hersteller Artikelnummer	10-4006
Alternativnummer	FBM-10-4006-5MG, FBM-10-4006-25MG
Hersteller	Focus Biomolecules
Kategorie	Biochemikalien
Produktbeschreibung	EP4 receptor antagonist....
Molekulargewicht	491.61
Reinheit	98% by TLC NMR (Conforms)
Formulierung	Off-white solid
CAS Nummer	[415903-37-6]
Formel	C26H29N5O3S
Anwendungsbeschreibung	Grapiprant is a potent ($K_i = 13$ nM for human and 20 nM for rat) and selective prostaglandin EP4 receptor antagonist. ¹ It produces antihyperalgesic effects in animal models of pain, and has significant anti-inflammatory effects in a rat model of adjuvant-induced arthritis. ² EP4 receptors have been shown to be involved in PGE2 stimulation of Th1 differentiation and Th17 expansion revealing a potential role for PGE2 receptors in immunosuppression. ^{3,4} Grapiprant/Pembrolizumab combination is in clinical trials for advanced or metastatic NSCLC adenocarcinoma. ⁵
