| Konjugation              | PE/Cy7                                                                                                                                                                                                                                                        |
| Produktbeschreibung      | Activation of C5 by a C5 convertase initiates the spontaneous assembly of the late complement components, C5-C9, into the membrane attack complex. C5b has a transient binding site for C6. The C5b-C6 complex is the foundation upon which the lytic comp... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                    |
