| Produktbeschreibung      | Functions as a ubiquitin ligase protein in vivo, mediating ubiquitination and promoting degradation of MEKK1, suggesting that it may regulate the Notch pathway via some ubiquitin ligase activity (By similarity). Regulator of Notch signaling, a signal... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                    |
