| Produktbeschreibung      | AT-motif binding factor 1 (ATBF1) binds to the AT-rich core sequence element in the human $\alpha$ -fetoprotein enhancer (1). Alternative splicing generates the ATBF1-A and ATBF1-B (2,3). While ATBF1-A contains a 920-amino acid extension at the N-terminus, b... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                            |
| Konzentration            | 1ug/ul                                                                                                                                                                                                                                                                |
| Puffer                   | Aqueous buffered solution containing 0.01M TBS (pH 7.4) with 1% BSA, 0.02% Proclin300 and 50% Glycerol.                                                                                                                                                               |
| Quelle                   | KLH conjugated synthetic peptide derived from human ATBF1                                                                                                                                                                                                             |

|                        |                                                             |
