| Produktbeschreibung      | Potassium channels are present in most mammalian cells, where they participate in a wide range of physiologic responses. The protein encoded by this gene is an integral membrane protein and inward-rectifier type potassium channel. It is activated by ... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                    |
| Konzentration            | 1ug/ul                                                                                                                                                                                                                                                        |
| Puffer                   | Aqueous buffered solution containing 0.01M TBS (pH 7.4) with 1% BSA, 0.02% Proclin300 and 50% Glycerol.                                                                                                                                                       |
| Quelle                   | KLH conjugated synthetic phosphopeptide derived from human KCNJ1 around the phosphorylation site of Ser44                                                                                                                                                     |
| Target-Kategorie         | phospho-KCNJ1 (Ser44)                                                                                                                                                                                                                                         |

|                        |                                                             |
