| Produktbeschreibung      | The leucine-rich (LRR) repeat is a 20-30 amino acid motif that forms a hydrophobic $\alpha$ / horseshoe fold, allowing it to accommodate several leucine residues within a tightly packed core. All LRR repeats contain a variable segment and a highly conserved ... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                            |
| Konzentration            | 1 $\mu$ g/ $\mu$ l                                                                                                                                                                                                                                                    |
