| Konjugation              | BF350                                                                                                                                                                                                                                                         |
| Produktbeschreibung      | The protein encoded by this gene is involved in the transforming growth factor beta signaling pathway that results in an inhibition of the proliferation of hematopoietic progenitor cells. The encoded protein is activated by bone morphogenetic protein... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                    |
