| Produktbeschreibung      | IFNAR1 is a type I membrane protein that forms one of the two chains of a receptor for interferons alpha and beta. Binding and activation of the receptor stimulates Janus protein kinases, which in turn phosphorylate several proteins, including STAT1 ... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                    |
| Konzentration            | 1ug/ul                                                                                                                                                                                                                                                        |
| Puffer                   | Aqueous buffered solution containing 0.01M TBS (pH 7.4) with 1% BSA, 0.02% Proclin300 and 50% Glycerol.                                                                                                                                                       |
| Quelle                   | KLH conjugated synthetic peptide derived from human IFNAR1 around the phosphorylation site of Tyr466                                                                                                                                                          |

|                        |                                                             |
