| Konjugation              | BF488                                                                                                                                                                                                                                                          |
| Produktbeschreibung      | Riboflavin transporter. Riboflavin transport is Na(+)-independent but moderately pH-sensitive. Activity is strongly inhibited by riboflavin analogs, such as lumiflavin. Weakly inhibited by flavin adenine dinucleotide (FAD) and flavin mononucleotide (...) |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                     |
| Konzentration            | 1ug/ul                                                                                                                                                                                                                                                         |
