| Konjugation              | BF350                                                                                                                                                                                                                                                          |
| Produktbeschreibung      | G-protein coupled receptor for glutamate. Ligand binding causes a conformation change that triggers signaling via guanine nucleotide-binding proteins (G proteins) and modulates the activity of downstream effectors. Signaling inhibits adenylate cyclase... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                     |
