| Produktbeschreibung      | The protein encoded by this gene is a member of the MAP kinase family. MAP kinases act as an integration point for multiple biochemical signals, and are involved in a wide variety of cellular processes such as proliferation, differentiation, transcri... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                    |
