| Produktbeschreibung      | Regulates eIF4E activity by preventing its assembly into the eIF4F complex: hypophosphorylated form competes with EIF4G1/EIF4G3 and strongly binds to EIF4E, leading to repress translation. Mediates the regulation of protein translation by hormones, g... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                    |
