| Produktbeschreibung      | Protein kinases are enzymes that transfer a phosphate group from a phosphate donor onto an acceptor amino acid in a substrate protein. By this basic mechanism, protein kinases mediate most of the signal transduction in eukaryotic cells, regulating ce... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                    |
