| Produktbeschreibung      | Phosphorylates the alpha subunit of eukaryotic translation-initiation factor 2 (EIF2), leading to its inactivation and thus to a rapid reduction of translational initiation and repression of global protein synthesis. Serves as a critical effector of ... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                    |
