| Konjugation              | PerCP/Cy5.5                                                                                                                                                                                                                                                   |
| Produktbeschreibung      | ATG4A is a cysteine protease required for autophagy, which cleaves the C-terminal part of either MAP1LC3, GABARAPL2 or GABARAP, allowing the liberation of form I. A subpopulation of form I is subsequently converted to a smaller form (form II). Form I... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                    |
