| Produktbeschreibung      | PRKAB2 and PRKAB1 are regulatory subunits of the AMP-activated protein kinase (AMPK). AMPK is a heterotrimer consisting of an alpha catalytic subunit, and non-catalytic beta and gamma subunits. AMPK is an important energy-sensing enzyme that monitors... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                    |
