| Produktbeschreibung      | Coronaviruses are enveloped viruses with a positive-sense RNA genome and with a nucleocapsid of helical symmetry. Coronavirus nucleoproteins localize to the cytoplasm and the nucleolus, a subnuclear structure, in both virus-infected primary cells and... |
| Tag                      | C-His                                                                                                                                                                                                                                                         |
