| Produktbeschreibung      | The RING-type zinc finger motif is present in a number of viral and eukaryotic proteins and is made of a conserved cysteine-rich domain that is able to bind two zinc atoms. Proteins that contain this conserved domain are generally involved in the ubi... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                    |
