| Produktbeschreibung      | Yellow fluorescent protein (YFP) is a genetic mutant of green fluorescent protein (GFP) originally derived from the jellyfish <i>Aequorea victoria</i> . Its excitation peak is 514 nm and its emission peak is 527 nm. Like the parent GFP, YFP is a useful tool ... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                            |
| Konzentration            | 1ug/ul                                                                                                                                                                                                                                                                |
| Klon-Bezeichnung         | [1H9]                                                                                                                                                                                                                                                                 |

|                        |                                                                                                        |
