| Konjugation              | Cy5.5                                                                                                                                                                                                                                                         |
| Produktbeschreibung      | The protein encoded by this gene is a member of the immunoglobulin binding factor family. It is synthesized by the epithelial cells of the prostate gland and secreted into the seminal plasma. This protein has inhibin-like activity. It may have a role... |
| Klonalität               | Recombinant                                                                                                                                                                                                                                                   |
| Konzentration            | Lot dependent                                                                                                                                                                                                                                                 |
