| Konjugation              | Cy7                                                                                                                                                                                                                                                           |
| Produktbeschreibung      | Appears to function predominantly as a heterodimeric complex with ILF3. This complex may regulate transcription of the IL2 gene during T-cell activation. It can also promote the formation of stable DNA-dependent protein kinase holoenzyme complexes on... |
| Klonalität               | Recombinant                                                                                                                                                                                                                                                   |
| Konzentration            | Lot dependent                                                                                                                                                                                                                                                 |
