Recombinant ACTH Antibody (CLIP polypeptide), Clone: [rCLIP/1407], Mouse, Monoclonal NSJ-V8938-100UG

Artikelname	Recombinant ACTH Antibody (CLIP polypeptide), Clone: [rCLIP/1407], Mouse, Monoclonal
Artikelnummer	NSJ-V8938-100UG
Hersteller Artikelnummer	V8938-100UG
Alternativnummer	NSJ-V8938-100UG
Hersteller	NSJ Bioreagents
Wirt	Mouse
Kategorie	Antikörper
Applikation	IHC-P
Spezies Reaktivität	Human
Immunogen	Amino acids NGAEDESAFAFPLEF from human ACTH was used as the immunogen for the recombinant ACTH antibody. This sequence is from the CLIP or Corticotropin-like intermediary peptide polypeptide of ACTH.
Produktbeschreibung	POMC (pro-opiomelanocortin or corticotropin-lipotropin) is a 267 amino acid polypeptide hormone precursor that goes through extensive, tissue-specific posttranslational processing by convertases. POMC is cleaved into ten hormone chains named NPP, ACT...
Klonalität	Monoclonal
Klon-Bezeichnung	[rCLIP/1407]

UniProt	P01189
Reinheit	Protein A/G affinity
Formulierung	0.2 mg/ml in 1X PBS with 0.1 mg/ml BSA (US sourced), 0.05% sodium azide
Antibody Type	Primary Antibody
Application Verdünnung	Immunohistochemistry (FFPE): 1-2ug/ml
Anwendungsbeschreibung	Optimal dilution of the recombinant ACTH antibody should be determined by the researcher.
