| Wirt                     | Mouse                                                                                                                                                                                                                                                                                 |
| Kategorie                | Antikörper                                                                                                                                                                                                                                                                            |
| Applikation              | ICC, IHC                                                                                                                                                                                                                                                                              |
| Spezies Reaktivität      | Feline, Human, Mouse, Primate, Rat                                                                                                                                                                                                                                                    |
| Immunogen                | Fusion protein amino acids 1882-2005 (cytoplasmic C-terminus) of rat Nav1.2 (accession number P04775) produced recombinantly in E. Coli                                                                                                                                               |
| Konjugation              | FL490                                                                                                                                                                                                                                                                                 |
| Produktbeschreibung      | Our Anti-Nav1.2 Na <sup>+</sup> channel mouse monoclonal primary antibody from NeuroMab is produced in-house from hybridoma clone K69/3. It detects feline, human, mouse, non-human primate, and rat Nav1.2 Na <sup>+</sup> channel, and is purified by Protein A chromatography. ... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                                            |
| Konzentration            | 0.5 mg/mL                                                                                                                                                                                                                                                                             |

|                        |                                              |
|------------------------|----------------------------------------------|
| Klon-Bezeichnung       | [K69/3]                                      |
| Molekulargewicht       | ~250 kDa                                     |
| Isotyp                 | IgG2a                                        |
| UniProt                | <a href="#">P04775</a>                       |
| Puffer                 | PBS with 0.09% azide                         |
| Target-Kategorie       | Nav1.2 Na <sup>+</sup> channel               |
| Antibody Type          | Primary Antibody                             |
| Anwendungsbeschreibung | Format: Purified by Protein A chromatography |
