| Applikation              | ICC, IHC                                                                                                                                                                                                                                                  |
| Spezies Reaktivität      | Human, Mouse                                                                                                                                                                                                                                              |
| Immunogen                | Fusion protein amino acids 700-836 (cytoplasmic C-terminus) of<br>mouse Neuroigin-2 (accession number Q69ZK9) produced<br>recombinantly in E. Coli                                                                                                        |
| Konjugation              | FL650                                                                                                                                                                                                                                                     |
| Produktbeschreibung      | Our Anti-Neuroigin-2 mouse monoclonal primary antibody from<br>NeuroMab is produced in-house from hybridoma clone L107/39. It<br>detects human and mouse Neuroigin-2, and is purified by Protein A<br>chromatography. It is great for use in IHC, ICC.... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                |
| Konzentration            | 0.5 mg/mL                                                                                                                                                                                                                                                 |

|                        |                                              |
|------------------------|----------------------------------------------|
| Klon-Bezeichnung       | [L107/39]                                    |
| Molekulargewicht       | 90-100 kDa                                   |
| Isotyp                 | IgG1                                         |
| UniProt                | <a href="#">Q69ZK9</a>                       |
| Puffer                 | PBS with 0.09% azide                         |
| Target-Kategorie       | Neuroligin-2                                 |
| Antibody Type          | Primary Antibody                             |
| Anwendungsbeschreibung | Format: Purified by Protein A chromatography |
