| Applikation              | ELISA                                                                                                                                                                                                                                                         |
| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Produktbeschreibung      | Functions both as NADH oxidoreductase and as regulator of apoptosis. In response to apoptotic stimuli, it is released from the mitochondrion intermembrane space into the cytosol and to the nucleus, where it functions as a proapoptotic factor in a cas... |
| Detektionsbereich        | 15.6-1,000pg/mL                                                                                                                                                                                                                                               |
| Sensitivitaet            | < 5.5pg/mL                                                                                                                                                                                                                                                    |
