BMP 2 Protein, E. coli **ASB-OPPA00526**

| | |
|--------------------------|---|
| Artikelname | BMP 2 Protein, E. coli |
| Artikelnummer | ASB-OPPA00526 |
| Hersteller Artikelnummer | OPPA00526 |
| Alternativnummer | ASB-OPPA00526-2UG |
| Hersteller | Aviva |
| Wirt | E. coli |
| Kategorie | Proteine/Peptide |
| Spezies Reaktivität | Human |
| Produktbeschreibung | Product Introduction: BMP2 belongs to the transforming growth factor-beta (TGFB) superfamily. Bone morphogenic protein induces bone formation. BMP2 is a candidate gene for the autosomal dominant disease of fibrodysplasia (myositis) ossificans progres... |
| NCBI | 650 |
| Reinheit | Greater than 95.0% as determined by (a) Analysis by RP-HPLC. (b) Analysis by SDS-PAGE. |
| Formulierung | BMP-2 was lyophilized from a concentrated (1mg/ml) sterile solution containing 10mM Sodium citrate pH=3.5. Physical appearance: Sterile Filtered White lyophilized (freeze-dried) powder. |
| Sequenz | The sequence of the first five N-terminal amino acids was determined and was found to be Met-Gln-Ala-Lys-His. |
