| Immunogen                | The immunogen is a synthetic peptide directed towards the C terminal region of human FOXK2                                                                                                                                                                    |
| Produktbeschreibung      | FOXK2 contains a fork head DNA binding domain. This protein can bind to the purine-rich motifs of the HIV long terminal repeat (LTR), and to the similar purine-rich motif in the interleukin 2 (IL2) promoter. It may be involved in the regulation of vi... |
