| Spezies Reaktivität      | Human, Rabbit                                                                                                                                                                                                                                                 |
| Immunogen                | The immunogen is a synthetic peptide directed towards the C-terminal region of Human ADRB1                                                                                                                                                                    |
| Produktbeschreibung      | ADRB1 is a beta-adrenergic receptors mediate the catecholamine-induced activation of adenylate cyclase through the action of G proteins. This receptor binds epinephrine and norepinephrine with approximately equal affinity. It mediates Ras activation ... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                    |
| Konzentration            | 1.0 mg/ml                                                                                                                                                                                                                                                     |
| Molekulargewicht         | 52kDa                                                                                                                                                                                                                                                         |
