| Hersteller               | Aviva                                                                                                                                                                                                                                                       |
| Wirt                     | Rabbit                                                                                                                                                                                                                                                      |
| Kategorie                | Proteine/Peptide                                                                                                                                                                                                                                            |
| Applikation              | IHC, WB                                                                                                                                                                                                                                                     |
| Spezies Reaktivität      | Bovine, Canine, Equine, Guinea pig, Human, Mouse, Rabbit, Rat, Zebrafish                                                                                                                                                                                    |
| Immunogen                | The immunogen is a synthetic peptide directed towards the middle region of human CHEK1                                                                                                                                                                      |
| Produktbeschreibung      | CHEK1 is required during normal S phase to avoid aberrantly increased initiation of DNA replication, thereby protecting against DNA breakage. Its expression is dispensable for somatic cell death and critical for sustaining G2 DNA damage checkpoint.... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                  |
| Konzentration            | 0.5 mg/ml                                                                                                                                                                                                                                                   |
| Molekulargewicht         | 54kDa                                                                                                                                                                                                                                                       |
