| Spezies Reaktivität      | Human, Porcine                                                                                                                                                                                                                                                |
| Immunogen                | The immunogen is a synthetic peptide directed towards the N terminal region of human ZNF16                                                                                                                                                                    |
| Produktbeschreibung      | ZNF16 belongs to the krueppel C2H2-type zinc-finger protein family. It contains 17 C2H2-type zinc fingers. ZNF16 may be involved in transcriptional regulation.The protein encoded by this gene contains a C2H2 type of zinc finger, and thus may function... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                    |
| Konzentration            | 0.5 mg/ml                                                                                                                                                                                                                                                     |
| Molekulargewicht         | 76kDa                                                                                                                                                                                                                                                         |
