| Immunogen                | Recombinant protein of human PTPN2                                                                                                                                                                                                                            |
| Konjugation              | Unconjugated                                                                                                                                                                                                                                                  |
| Produktbeschreibung      | The protein encoded by this gene is a member of the protein tyrosine phosphatase (PTP) family. Members of the PTP family share a highly conserved catalytic motif, which is essential for the catalytic activity. PTPs are known to be signaling molecules... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                    |
| Molekulargewicht         | 49 kDa                                                                                                                                                                                                                                                        |
| NCBI                     | <a href="#">5771</a>                                                                                                                                                                                                                                          |
