| Spezies Reaktivität      | Bovine, Goat, Human, Mouse, Porcine, Rabbit, Rat                                                                                                                                                                                                                |
| Immunogen                | The immunogen is a synthetic peptide directed towards the N terminal region of human TGFBR2                                                                                                                                                                     |
| Produktbeschreibung      | TGFBR2 is a member of the Ser/Thr protein kinase family and the TGFBR2 receptor subfamily. The protein is a transmembrane protein that has a protein kinase domain, forms a heterodimeric complex with another receptor protein, and binds TGF-beta. This re... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                      |
| Konzentration            | 1.0 mg/ml                                                                                                                                                                                                                                                       |
| Molekulargewicht         | 65 kDa                                                                                                                                                                                                                                                          |
| NCBI                     | <a href="#">7048</a>                                                                                                                                                                                                                                            |
