| Spezies Reaktivität      | Human, Primate                                                                                                                                                                                                                                                |
| Immunogen                | human thymocytes followed by Sezary T cells                                                                                                                                                                                                                   |
| Konjugation              | RPE                                                                                                                                                                                                                                                           |
| Produktbeschreibung      | Part of the TCR-CD3 complex present on T-lymphocyte cell surface that plays an essential role in adaptive immune response. When antigen presenting cells (APCs) activate T-cell receptor (TCR), TCR-mediated signals are transmitted across the cell membr... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Konzentration            | 20 ul / test                                                                                                                                                                                                                                                  |
| Klon-Bezeichnung         | [UCHT1]                                                                                                                                                                                                                                                       |
| Isotyp                   | IgG1                                                                                                                                                                                                                                                          |

|              |                                                                                                                                                                                     |

| NCBI         | <a href="#">916</a>                                                                                                                                                                 |
| Puffer       | The reagent is provided in phosphate buffered saline (PBS) containing 15 mM sodium azide and 0.2% (w/v) high-grade protease free Bovine Serum Albumin (BSA) as a stabilizing agent. |
| Formulierung | Stabilizing phosphate buffered saline (PBS), pH 7.4, 15 mM sodium azide                                                                                                             |
