| Immunogen                | Synthesized peptide derived from human PP2A-C Alpha around the phosphorylation site of Y307. Location: 250-330aa.                                                                                                                                             |
| Produktbeschreibung      | This gene encodes the phosphatase 2A catalytic subunit. Protein phosphatase 2A is one of the four major Ser/Thr phosphatases, and it is implicated in the negative control of cell growth and division. It consists of a common heteromeric core enzyme, w... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                    |
| Konzentration            | 1 mg/ml                                                                                                                                                                                                                                                       |
| Molekulargewicht         | 28 kDa                                                                                                                                                                                                                                                        |
