| Immunogen                | Synthesized peptide derived from the C-terminal region of human PRPH. Location: 390-470aa.                                                                                                                                                                    |
| Produktbeschreibung      | This gene encodes a cytoskeletal protein found in neurons of the peripheral nervous system. The encoded protein is a type III intermediate filament protein with homology to other cytoskeletal proteins such as desmin, and is a different protein that t... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                    |
| Konzentration            | 1 mg/ml                                                                                                                                                                                                                                                       |
| Molekulargewicht         | 55 kDa                                                                                                                                                                                                                                                        |
