Product Datasheet

Human NAPEPLD(N-acyl-phosphatidylethanolamine-hydrolyzing phospholipase D) ELISA Kit EBT-ELK0013

Artikelname	Human NAPEPLD(N-acyl-phosphatidylethanolamine-hydrolyzing phospholipase D) ELISA Kit
Artikelnummer	EBT-ELK0013
Hersteller Artikelnummer	ELK0013
Alternativnummer	EBT-ELK0013-96, EBT-ELK0013-48, EBT-ELK0013-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Human
Konzentration	5000 pg/mL
Detektionsbereich	78.13-5000 pg/mL
Sensitivitaet	18.9 pg/mL
UniProt	Q6IQ20
Proben	serum, plasma, saliva, tears and other biological fluids and other biological fluids

Anwendungsbeschreibung

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Enzyme & Kinase,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human NAPEPLD. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human NAPEPLD. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human NAPEPLD, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human NAPEPLD in the samples is then determined by comparing the OD of the samples to the standard curve
