## Product Datasheet

### Human AGE(Advanced Glycation End Product) ELISA Kit EBT-ELK0081

Artikelname	Human AGE(Advanced Glycation End Product) ELISA Kit
Artikelnummer	EBT-ELK0081
Hersteller Artikelnummer	ELK0081
Alternativnummer	EBT-ELK0081-96, EBT-ELK0081-48, EBT-ELK0081-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Human
Konzentration	8000 ng/mL
Detektionsbereich	125-8000 ng/mL
Sensitivitaet	38.2 ng/mL
Proben	serum, plasma and other biological fluids

Anwendungsbeschreibung

Assay Type: Competitive Inhibition. Assay length: 2h. Research Area: Metabolic pathway, Endocrinology, Cardiovascular biology, Hormone metabolism, . Test principle: This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with Human AGE. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human AGE. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human AGE in the samples is then determined by comparing the OD of the samples to the standard curve
