Product Datasheet

Human F-actin(Filamentous Actin) Microsample ELISA Kit EBT-ELK0113MS

Artikelname	Human F-actin(Filamentous Actin) Microsample ELISA Kit
Artikelnummer	EBT-ELK0113MS
Hersteller Artikelnummer	ELK0113MS
Alternativnummer	EBT-ELK0113MS-96, EBT-ELK0113MS-48, EBT-ELK0113MS-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Human
Konzentration	40 ng/mL
Detektionsbereich	0.63-40 ng/mL
Sensitivitaet	0.18 ng/mL
Proben	Serum, plasma, tissue homogenates

Anwendungsbeschreibung

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Signal transduction, Developmental science, Bone metabolism, . Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human F-actin. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human F-actin. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human F-actin, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human F-actin in the samples is then determined by comparing the OD of the samples to the standard curve
