Product Datasheet

Rat HNE(4-Hydroxynonenal) ELISA Kit EBT-ELK0115

Artikelname	Rat HNE(4-Hydroxynonenal) ELISA Kit
Artikelnummer	EBT-ELK0115
Hersteller Artikelnummer	ELK0115
Alternativnummer	EBT-ELK0115-96, EBT-ELK0115-48, EBT-ELK0115-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Rat
Konzentration	100 ng/mL
Detektionsbereich	1.57-100 ng/mL
Sensitivitaet	0.67 ng/mL
Proben	Serum, plasma, tissue homogenates

Anwendungsbeschreibung

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Signal transduction, Metabolic pathway, Infection immunity, Hormone metabolism, Dermatology, . Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Rat HNE. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Rat HNE. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Rat HNE, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Rat HNE in the samples is then determined by comparing the OD of the samples to the standard curve
