Product Datasheet

Cattle PGFM(Prostaglandin F Metabolite) ELISA Kit EBT-ELK0504

Artikelname	Cattle PGFM(Prostaglandin F Metabolite) ELISA Kit
Artikelnummer	EBT-ELK0504
Hersteller Artikelnummer	ELK0504
Alternativnummer	EBT-ELK0504-96, EBT-ELK0504-48, EBT-ELK0504-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Bovine
Konzentration	1000 pg/mL
Detektionsbereich	15.63-1000 pg/mL
Sensitivitaet	6.91 pg/mL
Proben	serum, plasma, tissue homogenates and other biological fluids

Anwendungsbeschreibung

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Signal transduction,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Cattle PGFM. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Cattle PGFM. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Cattle PGFM, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Cattle PGFM in the samples is then determined by comparing the OD of the samples to the standard curve
