## Product Datasheet

### Human Anti-p62(Ubiquitin Binding Protein P62 Antibody) ELISA Kit EBT-ELK0521

Artikelname	Human Anti-p62(Ubiquitin Binding Protein P62 Antibody) ELISA Kit
Artikelnummer	EBT-ELK0521
Hersteller Artikelnummer	ELK0521
Alternativnummer	EBT-ELK0521-96, EBT-ELK0521-48, EBT-ELK0521-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Human
Konzentration	8 ng/mL
Detektionsbereich	0.13-8 ng/mL
Sensitivitaet	0.049 ng/mL
Proben	serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids

Anwendungsbeschreibung

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Signal transduction, Developmental science,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human Anti-p62. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human Anti-p62. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human Anti-p62, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human Anti-p62 in the samples is then determined by comparing the OD of the samples to the standard curve
