Product Datasheet

Human EIF2A(Eukaryotic Translation Initiation Factor 2 subunit alpha) ELISA Kit EBT-ELK0541

Artikelname	Human EIF2A(Eukaryotic Translation Initiation Factor 2 subunit alpha) ELISA Kit
Artikelnummer	EBT-ELK0541
Hersteller Artikelnummer	ELK0541
Alternativnummer	EBT-ELK0541-96, EBT-ELK0541-48, EBT-ELK0541-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Human
Konzentration	5000 pg/mL
Detektionsbereich	78.13-5000 pg/mL
Sensitivitaet	32.4 pg/mL
UniProt	Q9BY44
Proben	tissue homogenates, cell lysates and other biological fluids

Anwendungsbeschreibung

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Signal transduction,. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human EIF2A. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human EIF2A. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human EIF2A, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human EIF2A in the samples is then determined by comparing the OD of the samples to the standard curve
