Product Datasheet

Hamster INS(Insulin) ELISA Kit EBT-ELK0659

Artikelname	Hamster INS(Insulin) ELISA Kit
Artikelnummer	EBT-ELK0659
Hersteller Artikelnummer	ELK0659
Alternativnummer	EBT-ELK0659-96, EBT-ELK0659-48, EBT-ELK0659-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Hamster
Konzentration	10 ng/mL
Detektionsbereich	0.16-10 ng/mL
Sensitivitaet	0.059 ng/mL
UniProt	P01313
Proben	Serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids

Anwendungsbeschreibung

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Metabolic pathway, Endocrinology, Hormone metabolism, . Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Hamster INS. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Hamster INS. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Hamster INS, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Hamster INS in the samples is then determined by comparing the OD of the samples to the standard curve
