Product Datasheet

Human 2,3-DPG(2,3-Diphosphoglycerate) ELISA Kit EBT-ELK0778

Artikelname	Human 2,3-DPG(2,3-Diphosphoglycerate) ELISA Kit
Artikelnummer	EBT-ELK0778
Hersteller Artikelnummer	ELK0778
Alternativnummer	EBT-ELK0778-96, EBT-ELK0778-48, EBT-ELK0778-96X5
Hersteller	ELK Biotechnology
Kategorie	Kits/Assays
Spezies Reaktivität	Human
Konzentration	20 µmol/mL
Detektionsbereich	0.32-20 µmol/mL
Sensitivitaet	0.14 µmol/mL
Proben	Serum, plasma, tissue homogenates, cell lysates and other biological fluids

Anwendungsbeschreibung

Assay Type: Sandwich. Assay length: 3.5h. Research Area: Metabolic pathway. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human 2,3-DPG. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human 2,3-DPG. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human 2,3-DPG, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm 10nm. The concentration of Human 2,3-DPG in the samples is then determined by comparing the OD of the samples to the standard curve
